## SUMMARY

I am a recent graduate in Informatics Engineering from Atma Jaya University, Yogyakarta. I thrive on new challenges and ambitious goals that drive my personal and professional growth.

My expertise lies in front-end development, utilizing **HTML**, **CSS**, **JavaScript**, and **React** to build responsive, user-focused web applications. Additionally, I have experience in back-end development with **Laravel**, **Node.js**, and **Express.js**, enabling me to contribute to full-stack projects.

Beyond development, I have a strong interest in helpdesk support, data analysis, system analysis, and software project planning. Recently, I have been exploring and implementing AI-driven solutions in my projects to enhance productivity and creativity, optimizing workflows and improving user experiences through intelligent automation and data-driven insights.

Additionally, I am passionate about learning languages such as Chinese, Japanese, and English to support my global perspective.

## KEY COMPETENCIES

programming language  
JavaScript, Laravel, PHP,  
NodeJs, ExpressJs, MySQL,  
Oracle, MongoDB, React JS

Team leadership, Communication,  
Operations management, Multi-  
Tasking, Flexibility
